

Rochester Institute of Technology's **Computer Science Community**

csc.cs.rit.edu

officers@csc.cs.rit.edu

The Computer Science Community (CSC) was created as a way to network with and reach out to computer science students, faculty, and staff outside of the classroom environment. Our goal is to provide a diverse set of academic, career-oriented, and social activities to build a stronger community within the Computer Science Department at RIT. We meet on a weekly basis and offer a variety of events to cater to a wide spectrum of interests. Stay on the lookout for our awesome events coming up during orientation week and beyond!

Tech Workshops!

Teacher Talks!

Board Game Nights!

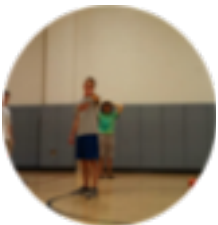

Hone your programming skills and experience a deeper involvement in the Computer Science field through teacher talks, exam reviews, hackathons, student-run tech workshops, and networking events hosted by some of the biggest names in the industry! Past events featured companies such as Microsoft, Google, Apple, Facebook, Intuit, and more.

Voice your input and make a real impact in the organization! Attend our weekly general member meetings and tell us what you think. Or take your involvement a step further and join one of our committees, dedicated to overseeing the various subcomponents of the organization.

Develop your professional and social networks with your professors and peers through fun social events! Our favorite activities include bowling, board and table-top games, dodge ball, laser tag, video games, and much more!

Sign up for our mailing list! Contact:
